

SDX *GRADE-UP OPTIONAL PARTS*

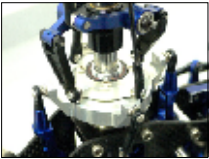

○0412-326 SZ-V Rotor head Assy

Aluminum CNC cut, blue anodized rotor head. It includes SSZ-IV radius block.
It can be bolted on to SDX. More precise control possible than stock plastic rotor head.

○0414-472 EX 120/125 swashplate

Standard parts from 90 size Turbulence D3. Aluminum CNC cut parts with more precision.
It can be used for all SWM Scedu series and Freya series. It can use both 120/135 SWM.
Compared with previous design, more cyclic pitch possible due to larger bearing.

○0414-530 EX 90 swashplate

Aluminum CNC cut parts with more precision. It can be used for all of HPM Scedu, Freya,
and VPUS Eagle 3 series. Compared with previous design, more cyclic pitch possible due to
larger bearing.

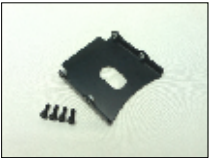

○0412-335 SDX-G Auto rotation case

Aluminum CNC cut, blue anodized auto rotation case. The parts is same size as stock plastic
parts. Due to being more precise metal case, one way bearing last better in this case.
Use stock bearing from stock kit.

○0412-336 SDX-G High torque auto rotation clutch Assy

Aluminum CNC cut, blue anodized auto rotation case. It uses sprag type one way bearing inside.
It can stand up to competition level hard 3D.

○0412-338 SDX-G fan cover

It improves air flow to engine and also works as frame stiffener. Only for SDX main frame.

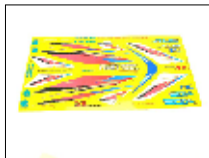

○0412-334 SDX-G Radius stay

Aluminum CNC cut, black anodized parts. Radius pin collar is made of polyacetal resin to reduce
wear. Stroke is 16mm longer than stock parts, thus recommended for 3D.

○0412-333

SDX-G SWM Lever stay
Aluminum CNC cut, blue anodized
parts. Only for SWM models.

○0412-337

SDX decal (pink)
Pink color decal instead of red from
stock kit.

○0412-332

SDX-G SWM elevator lever
Aluminum CNC cut, black anodized
parts. Only for SWM models.

○0414-532

E3 SWM Aileron lever
Aluminum CNC cut, black anodized
parts. Only for SWM models.
